

For cplace users who deal with data modeling, layouting and the administration of workspaces in a cplace environment

The cplace No-Code Training aims to enable the participants to administratively manage, edit and design workspaces in a cplace environment. The mix of methods is broadly diversified; in particular, the participants are given sufficient time to practice, including the optional work on a cplace case study after the attendance phase. The training is primarily designed for beginners and users with little previous knowledge.
