

The cplace Low-Code Training enables participants to independently implement functionalities with cplaceJS. The training courses convey basic knowledge of JavaScript and its integration in cplace. The training uses numerous practical examples to show the fields of application of cplaceJS, its possibilities and limitations. Learn how to use and integrate cplaceJS and low-code functionalities.

The training is divided into two attendance phases – **Basic** and **Advanced**.

## Included

- Two-day intensive training as a classroom event either for beginners (Basic) or Advanced
- Introduction to the programming language JavaScript and its application in cplace (cplaceJS)
- Work on various tasks based upon each other for the usage of cplaceJS
- Sufficient time for exercises and questions
- Six-month use of the training environment and access to the relevant materials and sample solutions
- Lunch, snacks and drinks during the presence phase (at collaboration Factory and QuinScape locations)

## Dates

- You can find dates [here](#)
- Individual dates by arrangement

## Expenses

- **Basic:**  
per participant: 3.000 Euro plus VAT
- **Advanced:**  
per participant: 3.000 Euro plus VAT

## Modules at a glance

### Classroom training Basic

(requires No-Code Training)

Day 1: Introduction to JavaScript

Day 2: JavaScript in cplace (cplaceJS)

### Classroom training Advanced

(requires Low-Code Training Basic)

Day 1: Warm-up cplace JS, Highcharts and Workflow Manager

Day 2: Office Reporting

### Training client

6 months starting from presence period

## Contents of attendance phase

### Basic:

- Basic JavaScript: variables, data types, operators, control structures, functions, logging
- cplaceJS: change listeners, page actions, validators, manipulation of pages, sending notifications, logging, Low-Code Best Practises

### Advanced:

- Creation of reports with Office Reporting
- Data visualization with Highcharts
- Definition of workflows with the Workflow Manager

## Requirements

- **Basic:** cplace No-Code Training completed, MS Office
- **Advanced:** cplace Low-Code Training Basic completed, MS Office

**Zoom** is generally used as a conference tool for online training. Other solutions are possible by arrangement.
