

Increase CIP effectiveness and boost quality

cplace CIP App

The screenshot displays the 'PDCA-Zyklus' dashboard in the cplace application. The dashboard title is 'Plan-Do-Check-Act Dashboard' with the subtitle 'Übersicht über alle PDCA-Zyklen'. It features two pie charts: 'Verantwortlicher' (Responsible) and 'Status'. The 'Verantwortlicher' chart shows three segments for 'Beispielnutzer Lisa Bonn', 'Beispielnutzer Mara Bach', and 'Beispielnutzer Theo Test'. The 'Status' chart shows two segments for 'abgeschlossen' and 'erstellt'. Below the charts is a table of PDCA cycles:

PDCA-Zyklus	Durchführungsdatum	Status	Verantwortlicher
PDCA Etikettierung	16.05.2019	abgeschlossen	Beispielnutzer Theo Test
PDCA Getränkeautomaten	23.05.2019	erstellt	Beispielnutzer Mara Bach
PDCA Transportweg-Markierungen	26.04.2019	abgeschlossen	Beispielnutzer Lisa Bonn

At the bottom of the table, it indicates '3 Treffer | Keine Zellen ausgewählt | 1 Zeile markiert'. The interface is powered by collaboration Factory.

Transparency across all processes

Guided, structured management

Easy identification of improvement potential

The cplace CIP App is a flexible solution enabling you to transparently manage the activities and methods of your Continuous Improvement Process (CIP) using cplace. All employees can take an active role, capturing and assessing issues and planning activities. This keeps them involved in the process on a continuous basis. Improvement potential can be identified, assessed and analyzed effortlessly using the tool to establish a successful, software-supported improvement process across the enterprise.

All CIP methods are interlinked within the application. The assessment criteria for proposed solutions can be adjusted to meet the company's specific requirements, thereby implementing a methodical, structured approach to continuous improvements throughout all parts of the organization.

Business Challenge

Enterprises must evolve continuously to adjust to changing market conditions and remain competitive. By implementing a stringent continuous improvement scheme you make sure that your company's processes are highly effective and achieve top quality, your employees are happy and your costs stay down so you can drive the development of the entire organization.

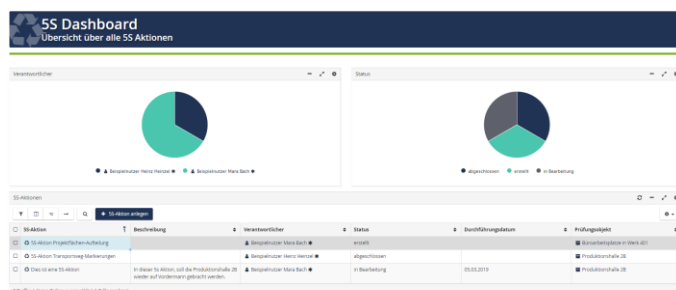

Customer benefits

The cplace CIP app provides employees with a wide range of collaboration and assessment options, allowing them to get actively ("bottom-up") involved in the continuous improvement process while benefitting from the company's accumulated knowledge assets. Another great advantage of the cplace CIP app is its integrated issue, improvement and idea management feature (top-down) enabling controlled, structured, tool-supported handling of associated activities.

Special features

1. PDCA cycle: The tool's key control feature and core method is the Plan-Do-Check-Act (PDCA) activity cycle, which guides the root cause analysis of issues, the definition and implementation of appropriate measures, and the development of new standards. The four phases – Plan, Do, Check, Act – outline a methodical approach to issue resolution and are presented by the cplace CIP app on an intuitive, easy-to-use dashboard.
2. 5S method: The 5S method may be applied by individual users or the entire enterprise. The CIP app efficiently supports the five-step approach to ensure maximum value-add.
3. Waste detection feature: The Waste detection feature provides a disciplined means to identify sources of waste. Users of the cplace CIP app can apply it to any process. The tool offers optimum support for the three main pillars of lean waste detection (Muda, Mura and Muri).
4. Idea management & lessons learned: Delivering embedded, comprehensive support for idea management and lessons learned, the CIP tool provides seamless guidance for a successful CIP process.
